

Permit to Work Systems

Who should attend?

This course is designed for anyone who will be creating and issuing permits, as well as those who will supervise or carry out the work covered by a permit. It explains the duties of everyone responsible for the permit, from the point of issue to the work's completion.

Course Aims & Objectives

A permit-to-work system is a formal written system used to control certain types of work that are potentially hazardous. A permit-to-work is a document which specifies the work to be done and the precautions to be taken. Permits-to-work form an essential part of safe systems of work for many maintenance activities. They allow work to start only after safe procedures have been defined and they provide a clear record that all foreseeable hazards have been considered.

This course explains the legal requirements of establishing and using permit to work systems.

Course Outline

- Underlying principles of use
- What tasks need them?
- General and special permits
- Competencies required
- Setting up and operating under the permit
- Record keeping
- Consultation with the workforce

Certification

Certificates of attendance will be awarded to delegates upon completion of the course.

Duration

½ Day

Location

We can offer courses on company premises for a maximum of 12 delegates or upcoming open courses in your local area.
